SOFTWARE DEVELOPER

Full-Stack Development | React.js | Node.js | JavaScript | PostgreSQL

PROFESSIONAL SUMMARY

Computer Science graduate and Full-Stack Software Developer with practical experience designing, developing, testing, deploying and maintaining business software applications. Currently employed as an Administrator at Mbevha Motors, where she independently gathered business requirements and developed a full-stack Workshop Management System using React.js, Node.js, Express.js, PostgreSQL and REST APIs. Also designed, developed and deployed Vhalaudzi Cash Loan, a production loan management and digital lending platform with NuPay API integration. Experienced in designing user interfaces, system architecture, database schemas, backend services, data models and role-based application functionality. Proven ability to translate operational requirements into scalable digital solutions that improve business administration and service delivery. Brings practical knowledge of JavaScript, Java, HTML, CSS, SQL, frontend and backend development, database management, application debugging, documentation and stakeholder support.

CORE COMPETENCIES

- Full-Stack Software Development
- Business Requirements Gathering
- Software Application Design
- Frontend Architecture
- Backend System Development
- UI and User Experience Design
- Database Schema Design
- REST API Development
- Software Architecture
- Data Modelling
- System Integration
- Application Deployment
- Production Application Maintenance
- Software Testing and Debugging
- Technical and Functional Documentation
- Project Scope Management
- Digital Transformation Solutions
- Independent Project Delivery

PROFESSIONAL EXPERIENCE

Administrator — Mbevha Motors (Pty) Ltd | March 2026 – Present

- Manage the company's day-to-day administrative and office operations.
- Maintain customer, vehicle, financial and operational records.
- Prepare and process quotations and invoices.
- Communicate with customers and respond to administrative and service-related enquiries.
- Manage business documentation and coordinate daily office activities.
- Provide administrative and operational support to management.
- Gathered business and user requirements directly from company management.
- Translated operational requirements into the design of a full-stack Workshop Management System.
- Designed the system architecture, user interface and PostgreSQL database structure.
- Developed reusable frontend components and user interfaces using React.js.
- Developed backend functionality, APIs and data models using Node.js and Express.js.
- Integrated the React frontend, REST APIs and PostgreSQL database.
- Developed authentication and role-based system access.
- Developed customer, vehicle, quotation, invoice, inventory, service and administration modules.
- Designed and maintained database schemas to support data integrity and system reliability.
- Tested and debugged the application to resolve functionality, workflow and data-related issues.
- Deployed the application to support operational use within the business.

- Maintain and enhance the application based on changing business requirements.
- Provide ongoing application support and resolve system issues affecting users.
- Take ownership of development activities from requirements gathering through implementation and maintenance.

Frontend Developer Intern | July 2025 – December 2025

- Developed and maintained frontend application functionality.
- Assisted with designing responsive and user-friendly interfaces.
- Diagnosed and resolved software defects and application issues.
- Conducted system and functionality testing to validate application performance.
- Identified root causes of system problems and implemented corrective actions.
- Supported application deployment and maintenance activities.
- Documented technical issues and implemented solutions.
- Participated in Agile development, team meetings and collaborative problem-solving.
- Assisted with debugging, quality assurance and application optimisation.
- Managed competing development tasks and delivered work within required deadlines.

PROJECT EXPERIENCE

Vhalaudzi Cash Loan – Loan Management & Digital Lending Platform (Full-Stack Developer)

- Designed and developed a full-stack digital lending platform for a real business, deployed at vhalaudzicashloans.co.za.
- Built customer registration, authentication, login and loan application workflows.
- Developed loan application management, loan status tracking and repayment information functionality.
- Developed an administrative dashboard with admin authentication and loan/customer management.
- Integrated the NuPay API to connect the loan workflow with payment and debit-order processing.
- Developed REST APIs for communication between the React frontend and Node.js/Express backend.
- Designed and integrated a PostgreSQL database and a secure backend architecture.
- Deployed to production (frontend on Vercel, backend on Render) and maintain the live system.
- Repository: github.com/MashuduNemutudi/vlms

Mbevha Motors – Workshop Management System

- Designed and developed a full-stack application for managing workshop and administrative operations.
- Gathered business requirements directly from management and converted them into functional software requirements.
- Designed the application architecture, database structure and user interface.
- Built the frontend architecture and reusable user-interface components using React.js.
- Developed the backend system and REST APIs using Node.js and Express.js.
- Designed and integrated a PostgreSQL database.
- Implemented secure authentication and administrative access controls.
- Developed customer and vehicle registration functionality.
- Developed quotation and invoice-management functionality.
- Developed workshop service and vehicle-maintenance functionality.
- Developed inventory-management functionality.
- Tested and debugged application components and end-to-end workflows.
- Deployed the system to improve business efficiency and administrative control.
- Continue to maintain and expand the application according to business needs.

Agrivision – User Management Dashboard

- Developed a Java EE web application with complete CRUD functionality.
- Designed and implemented database-driven user-management functionality.
- Developed application components using JSP and Servlets.
- Troubleshoot software issues and resolved application defects.
- Conducted system testing and validation.
- Deployed the application using GlassFish Server.
- Improved system functionality and performance through testing and optimisation.

Ubuntu Explorer – Web-Based File Explorer

- Designed and developed an interactive web-based file-navigation system.
- Developed user interface and navigation functionality.
- Identified and corrected application-interface and functionality issues.
- Performed software testing, troubleshooting and validation.
- Improved user experience through application enhancements.

E-Library-Log – Attendance and Leave Management System

- Gathered and analysed application requirements.
- Designed functionality to support attendance and leave-management processes.
- Implemented role-based access-management functionality.
- Diagnosed workflow and system-functionality issues.
- Conducted system testing, validation and optimisation.
- Improved application reliability and user accessibility.

LEADERSHIP EXPERIENCE

Mentor – Kidathon and Telkom Hackathon

- Assisted participants with programming, technical troubleshooting and problem-solving.
- Guided teams in evaluating requirements and developing technology solutions.
- Supported participants in collaborative and deadline-driven environments.

Chairperson – Geekulcha Student Society (2025)

- Led student technology initiatives and coordinated technical activities.
- Managed project planning, organisation and stakeholder communication.
- Facilitated collaboration and supported the resolution of project challenges.

Scrum Master – MAISH Hackathon

- Coordinated software project activities and team workflows.
- Managed task allocation, delivery tracking and issue resolution.
- Supported the development team in meeting project deadlines.
- Facilitated communication and collaborative problem-solving.

EDUCATION

- Diploma in Computer Science — Tshwane University of Technology | Completed Work Integrated Learning
- National Senior Certificate — Lwamondo High School

CERTIFICATIONS

- Certificate in Cyber Security — University of Johannesburg | Completed – Certificate Pending
- Responsive Web Design — freeCodeCamp
- Backend Development and APIs — freeCodeCamp
- Relational Databases — freeCodeCamp
- IT For Business — HP Life
- Cybersecurity Awareness — HP Life
- Business Communication — HP Life
- Java Fundamentals — Code with Mosh

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python, SQL, HTML, CSS

Frontend Development: React.js, React Native, Responsive Web Design, Reusable Components, User Interface Development, HTML5 and CSS

Backend Development: Node.js, Express.js, Java EE, JSP, Servlets, REST APIs, MVC Architecture

Databases: PostgreSQL, MySQL, Oracle SQL, Database Schema Design, Data Modelling, CRUD Operations, Data Integrity

Development and Deployment Tools: Git, Visual Studio Code, IntelliJ IDEA, GlassFish Server, Vercel, Render

Software Development Capabilities: Full-Stack Application Development, Business Requirements Analysis, Software Architecture, UI and User Experience Design, API Design and Integration, Authentication and Access Control, Application Testing, Software Debugging, Application Deployment, Production Maintenance, Functional Specifications, Technical Documentation, User Support, Project Scope Coordination

ADDITIONAL SKILLS

Microsoft Office, Email Applications, Customer Communication, Attention to Detail, Analytical Thinking, Problem-Solving, Time Management, Team Collaboration, Independent Working, Multitasking, Deadline Management, Adaptability.

ACHIEVEMENTS

- Independently designed, developed, tested and deployed the Mbevha Motors Workshop Management System from business requirements through implementation.
- Designed, developed and deployed the Vhalaudzi Cash Loan platform, including NuPay API integration, now live in production.
- Developed full-stack applications using React.js, Node.js, Express.js, PostgreSQL and REST APIs.
- Implemented customer, vehicle, inventory, quotation, invoice, authentication and workshop service-management functionality.
- Delivered a digital transformation solution that improved the company's administrative and workshop-management processes.
- Built and deployed multiple software applications demonstrating frontend, backend, database, testing and troubleshooting capabilities.
- Successfully completed the Work Integrated Learning requirements for a Diploma in Computer Science.
- Completed a Certificate in Cyber Security through the University of Johannesburg, with the certificate pending.
- Led technology initiatives as Chairperson of the Geekulcha Student Society.
- Mentored participants during Kidathon and Telkom Hackathon programmes.
- Served as Scrum Master during the MAISH Hackathon.
