PROFESSIONAL SUMMARY

Computer Science graduate with practical experience in IT technical support, software development, application troubleshooting, database systems and system analysis. Skilled in Java, JavaScript, Python, SQL, React.js, Node.js, Express.js, PostgreSQL and REST APIs. Experienced in developing and deploying real-world business applications, analysing user requirements, troubleshooting technical issues and working collaboratively in professional and agile environments. Currently gaining enterprise IT support experience through a Graduate IT Internship with Nkgwete IT Solutions at Eskom Megawatt Park. Strong problem-solving, communication, teamwork and analytical skills, with a strong interest in software development, IT systems and technology.

CORE COMPETENCIES

- IT Technical Support
 - Application Development
 - Frontend and Backend Development
 - User Requirement Analysis
 - Technical Troubleshooting
 - Software Testing and Quality Assurance
 - Database Design and SQL
 - REST API Development and Integration
 - Object-Oriented Programming
 - System Analysis and Problem Solving
 - Agile and Scrum Collaboration
 - Version Control and Software Deployment
-

PROFESSIONAL EXPERIENCE

IT Technical Support Intern

Nkgwete IT Solutions | Eskom Megawatt Park, Johannesburg
August 2026 – Present

- Provide first-line IT technical support to users within an enterprise environment.
- Troubleshoot hardware, software, connectivity and general technical issues.
- Assist users with IT-related queries and provide appropriate technical support.
- Investigate reported issues, identify possible causes and implement or escalate solutions where required.
- Gain practical experience in enterprise IT support, user assistance, problem-solving and IT service delivery.
- Work collaboratively with technical teams and users to resolve issues efficiently.
- Follow organisational procedures and maintain professionalism when handling user and technical requests.

Administrator / Software Developer

Mbevha Motors (Pty) Ltd
March 2026 – August 2026

- Supported daily administrative and operational activities within an automotive workshop environment.
- Analysed business requirements and translated operational needs into software solutions.
- Designed and developed a full-stack workshop management system to improve business operations.
- Developed functionality for customer, vehicle, quotation, invoice, inventory and service management.
- Built REST APIs and integrated frontend, backend and database components.
- Designed and implemented PostgreSQL database structures and system workflows.
- Tested, debugged and resolved application and system issues.
- Deployed and maintained the application for real-world business use.

Frontend Developer Intern

ICEP, Tshwane University of Technology
July 2025 – December 2025

- Participated in application development, enhancement and maintenance activities.
 - Assisted in analysing user requirements and translating them into functional solutions.
 - Diagnosed and resolved technical issues during development and testing.
 - Supported software testing and validation to ensure application functionality and reliability.
 - Troubleshoot bugs and system errors and contributed to application improvements.
 - Collaborated with team members in an agile environment to achieve project milestones.
 - Communicated technical issues and progress effectively within the development team.
-

PROJECT EXPERIENCE

Mbevha Motors – Workshop Management System

- Designed and developed a full-stack workshop management system for real-world business use.
- Developed customer, vehicle, quotation, invoice, inventory and service-management functionality.
- Built REST APIs using Node.js and Express.js.
- Developed the frontend using React.js and integrated it with the backend.
- Designed and implemented PostgreSQL database structures and relationships.
- Implemented authentication and role-based access functionality.
- Tested, debugged and deployed the application.

Technologies: React.js, Node.js, Express.js, PostgreSQL, JavaScript, REST APIs

Vhalaudzi Cash Loans – Loan Management System

- Developed a full-stack loan management application for managing customer loan applications and repayments.
- Implemented customer, loan and administrative functionality.
- Integrated the NuPay API for payment and debit-order processing.
- Designed database structures and application workflows.
- Tested and deployed the application using cloud-based services.

Technologies: React.js, Node.js, Express.js, PostgreSQL, JavaScript, REST APIs, NuPay API

AgriVision – User Management Dashboard

- Developed a Java EE web application with full CRUD functionality.
- Designed and implemented database structures and system workflows.
- Implemented user management functionality.
- Troubleshoot system errors and resolved application bugs.
- Deployed and tested the system using GlassFish Server.

Technologies: Java EE, Java, SQL, GlassFish, Database Design

Ubuntu Explorer – Web-Based File Explorer

- Developed an interactive web-based system simulating Linux file navigation.
- Implemented file-navigation functionality and user interaction features.
- Identified and resolved UI and system functionality issues.
- Performed testing and usability improvements.

E-Library-Log – Attendance and Leave Management System

- Analysed system requirements and designed application workflows.

- Implemented role-based access control functionality.
 - Supported testing, validation and system improvements.
 - Designed functionality to support attendance and leave management processes.
-

EDUCATION

Diploma in Computer Science

Tshwane University of Technology (TUT)

Completed: 2026

Relevant areas of study:

- Software Programming
- Mobile Device Programming
- Database Design
- System Analysis

National Senior Certificate

Lwamondo High School

Completed: 2021

TECHNICAL SKILLS

- **Programming:** Java, JavaScript, Python, SQL
 - **Frontend:** HTML, CSS, React.js, React Native
 - **Backend:** Node.js, Express.js, Java EE
 - **Databases:** PostgreSQL, MySQL, Oracle SQL
 - **APIs:** REST APIs, API Integration, NuPay API
 - **Development Tools:** Git, GitHub, Vite, Postman
 - **Software Development:** MVC Architecture, Object-Oriented Programming, CRUD
 - **IT Support:** Technical Support, Hardware Troubleshooting, Software Troubleshooting, User Support
 - **Development Practices:** Agile, Scrum, Software Testing, Debugging, System Analysis
 - **Other:** Microsoft Office, Documentation, Problem Solving
-

CERTIFICATIONS AND TRAINING

- Certificate in Cyber Security – University of Johannesburg

- Responsive Web Design – freeCodeCamp
 - Backend Development and APIs – freeCodeCamp
 - Relational Databases – freeCodeCamp
 - IT for Business – HP LIFE
 - Cybersecurity Awareness – HP LIFE
 - Business Communication – HP LIFE
 - Java Fundamentals – Code with Mosh
-

LEADERSHIP AND EXTRA-CURRICULAR EXPERIENCE

Chairperson – Geekulcha Student Society (GKSS)

2025

- Led student technology initiatives and activities.
- Coordinated with members and stakeholders to support society programmes.
- Developed communication, leadership and teamwork skills.

Scrum Master – MAISH Hackathon

- Facilitated team collaboration and task coordination.
- Supported agile planning and project delivery.
- Helped the team maintain focus on project objectives and deadlines.

Mentor – Kidathon and Telkom Hackathon

- Supported participants with technical guidance and problem-solving.
 - Assisted learners and participants during project development activities.
-

ACHIEVEMENTS

- Top 10 – SMU Digital Hackathon 2025
- 2nd Place – MAISH Hackathon
- Successfully developed and deployed real-world business applications.
- Completed a full-stack workshop management system for Mbevha Motors.
- Developed and deployed the Vhalaudzi Cash Loans loan management system.
- Gained practical enterpri
